To Whom It May Concern

My name is Iva Lim Peck. I am a licensed acupuncturist in the State of Texas. I have been in health care for 35 years. Prior to coming to the US, I did my RN, midwifery and psychiatric nursing in England and had worked in almost every field of nursing. From there I went to study Chinese Medicine in Taiwan for 4 years. I have been practicing acupuncture and Oriental Medicine in the US since 1982.

I have been in private practice with my husband in the Dallas metroplex since 1985 and I was involved politically in various organizations in promoting the recognition of our profession in this country. I was past vice president of the Texas Acupuncture Association, past Board of Director for the American Association for Oriental Medicine and past commissioner of the National Accreditation Commission for Oriental Medicine.

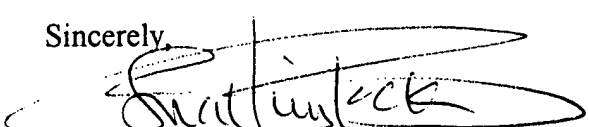

I have a very successful practice utilizing acupuncture and all the various modalities in Oriental Medicine. However, there were some cases that I was not able to help completely with Oriental Medicine alone. I started to research into other techniques and in the last 10 years have incorporated numerous techniques based on the theory and philosophy of Chinese Medicine.

My first encounter with NMT was a search for my own health care issues. Dr. Feinberg was kind enough to treat me as a private patient. I was greatly improved within a considerably short period of time. That was when I decided to learn the technique as taught by Dr. Feinberg. I have done both the Comprehensive and the Advanced levels twice and have been very impressed with Dr. Feinberg's system. The NMT system works.

I have since then integrated NMT into my practice. I have treated a wide range of health care issues using the NMT technique as taught by Dr. Feinberg and have some miraculous and awesome results that I don't think I could ever accomplish without this Neuromodulation Technique.

I have learned various techniques over the years, many had made claims on the effectiveness of their technique. I have found that NMT is a unique protocol one of its kind that will provide the cutting edge in new discoveries in health care issues. Please feel free to contact me if you have any questions.

Sincerely,

  
Dr. Iva Lim Peck L.Ac.; Dipl. Ac. (NCCAOM); RN; RMT; LDHS
